## Write a function to find moving average in an array over a window:

Test it over [3, 5, 7, 2, 8, 10, 11, 65, 72, 81, 99, 100, 150] and window of 3.

```
In [35]:
```

```
def moving_avg(lst,window):
    arr=np.array(lst)
    m = 0
    n = int(window)
    arravg=[]

for i in range(len(arr) - (window-1)):
    arravg.append(np.average(arr[m:n]))
    m = m +1
    n = n + 1

    print(arravg)
```

## In [33]:

```
moving_avg([3, 5, 7, 2, 8, 10, 11, 65, 72, 81, 99, 100, 150],3)
```

In [36]:

```
moving_avg([1,2,3,4,5],3)
```

[2.0, 3.0, 4.0]

In [38]:

```
moving_avg([10,20,30,40,50,60,70,80,90,100],4)
```

[25.0, 35.0, 45.0, 55.0, 65.0, 75.0, 85.0]
